

## FTTH Drop Cable Patch Cord

### Product Description

FTTH drop cable Patch cord, refers to the drop cable ends with a connector plug,used to achieve optical active connection,also be made into a single head pigtails,and Flexible Splice,Quick connect and other products combined application. For FTTH project corridor boxes,drop cable distribution boxes,FTTH fiber boxes and other forms of installation.

### Features

- Ceramic Ferrule
- High return loss
- Low insertion loss
- Good repeatability and and exchangeability
- Excellent Polished and 100% tested
- Complying with Telcordia ,GR-326-Core, IEC and RoHS Standard

### Application

- FTTX+LAN
- Optical fiber CATV
- Optical communication system
- FTTH

### Specification

| Fibers                  | 1 / 2               | Fiber type     | G652D/G657A1/G657A2  |
|-------------------------|---------------------|----------------|----------------------|
| Strength member         | Steel/FRP/KFRP      | Outer sheath   | PVC/LSZH             |
| Length                  | Customized          | Connector type | SC / LC              |
| Cable size              | 2.0X3 .0/ 2.0x5.0mm | Cable color    | Black/White          |
| Insertion loss(APC&UPC) | ≤0.30 dB            | Return loss    | ≥60(APC)<br>≥50(UPC) |
